OBJECTIVE

I'm excited for change. I have lived my career days in the trades. I am a licensed commercial Electrician and aside from the science of Electricity, I found that I very much do not enjoy being an electrician. I loved problem solving, dynamic thinking and making applicable solutions. In search of happiness and retaining the job aspects I loved, I found my desire to code, develop, and design.

EXPERIENCE

2010-2017 COMMERCIAL/RESIDENTIAL ELECTRICIAN

- Electrical circuitry
- Electrical theory
- Problem solving
- Access Control/ Security
